Best CMMS
Grayslake IL/US
Call:

Best CMMS offers CMMS packages that help improve equipment maintenance, extend asset life, and reduce part inventories - resulting in lower operating costs.

Best CMMS as GFD Management products help companies schedule maintenance, inspections, track work orders and generate reports.

These features result in savings on asset replacement.

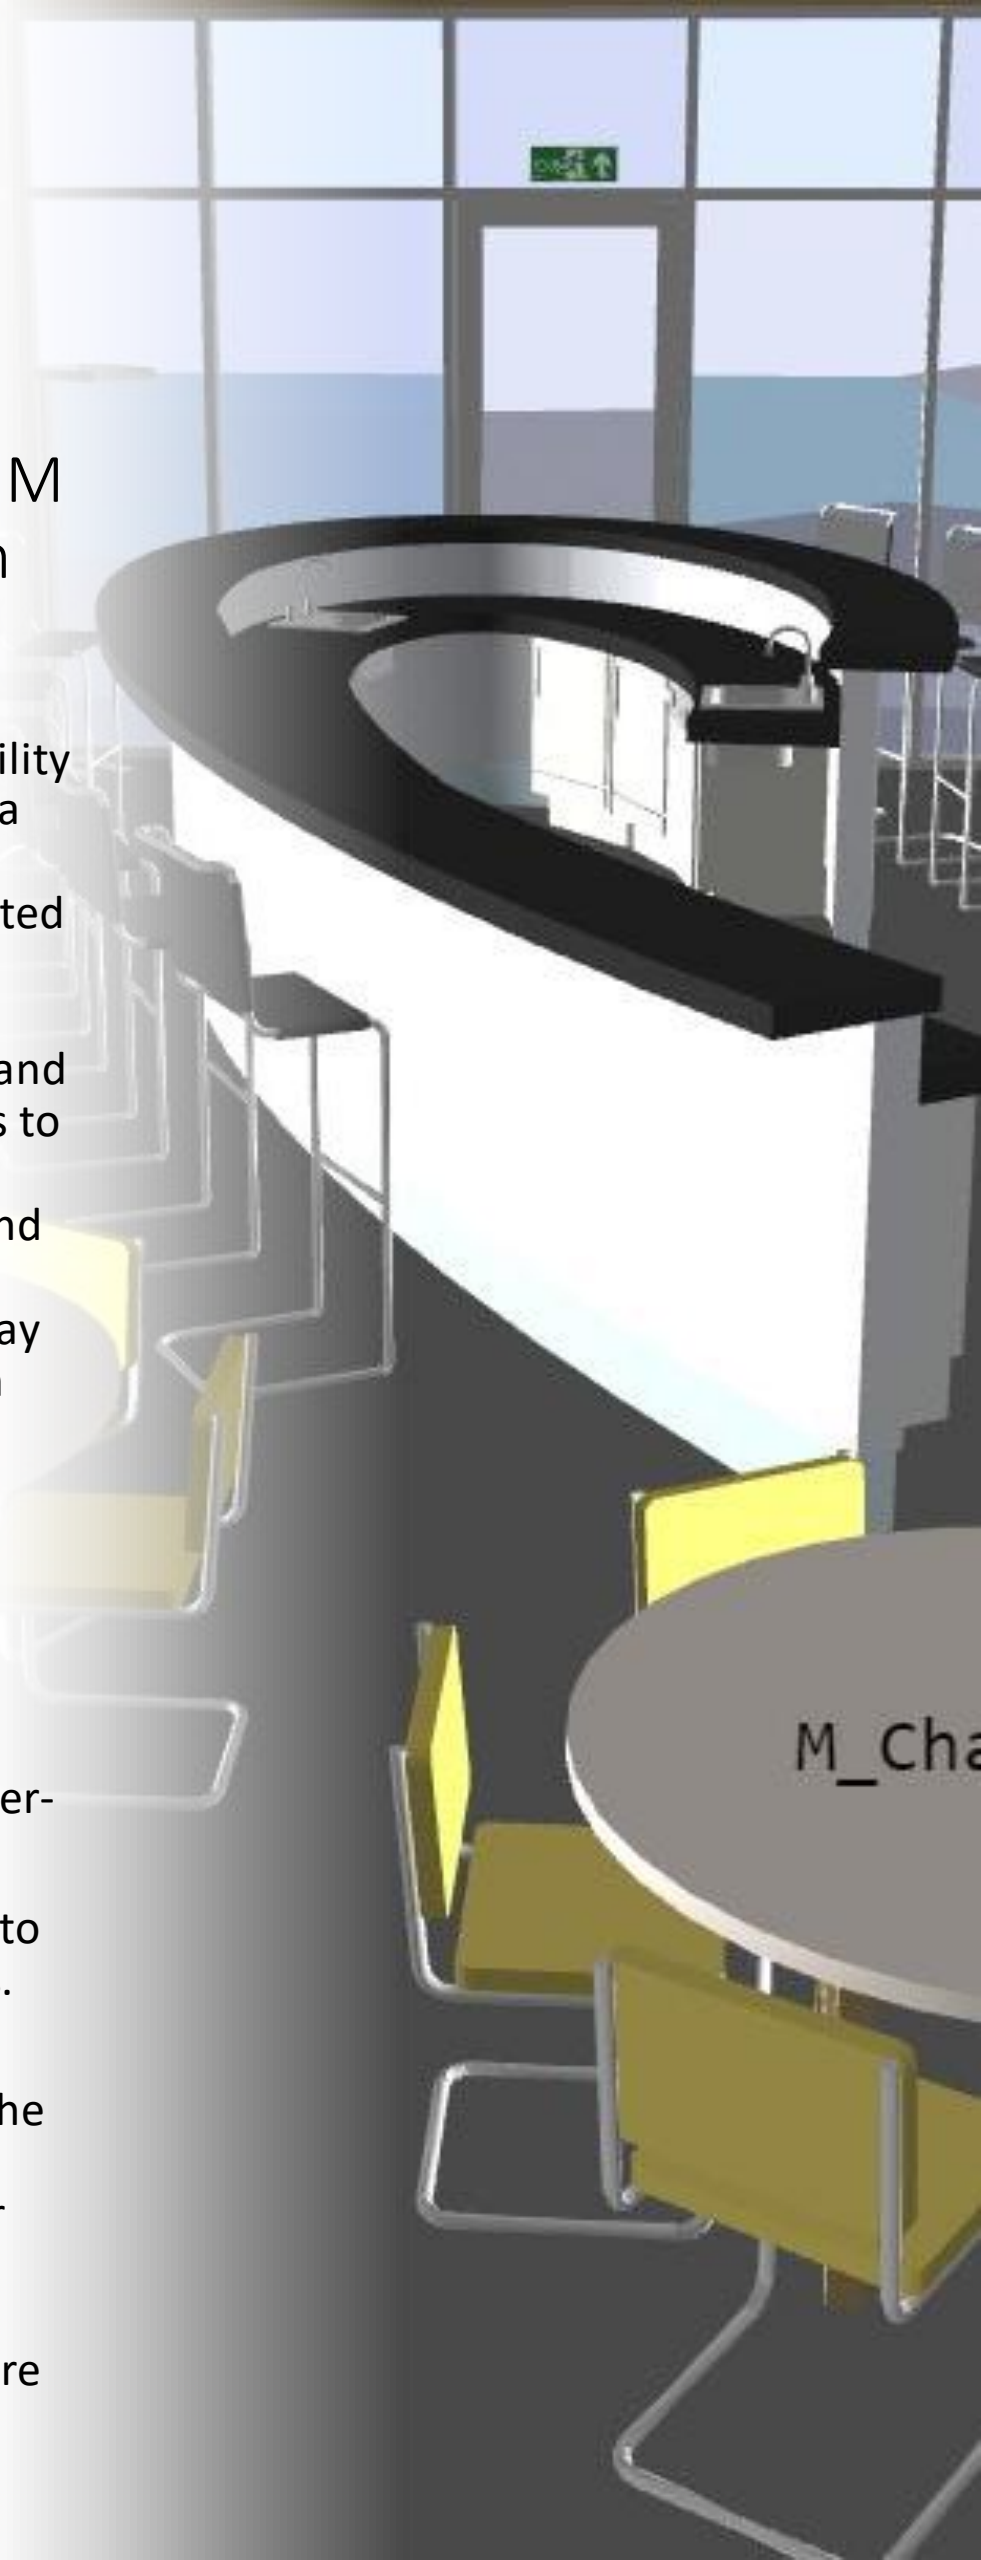

iBIM CAD/BIM Visualization

Connect and visualize your Facility Management data with **Best CMMS iBIM**. The integrated iBIM 3D Web Browser lets you quickly identify and localize the assets to be maintained, manage spaces and occupants to be moved, and display asset / inspection groups onto your BIM Drawings.

Highlights

- Zero time to install, simply activate this feature on a user-level basis.
- Minimal effort to import IFC files.

We make your interaction with the data as easy as possible and offer convenient drag/drop functionality where possible.

Electronic Document Management System

Version Control

Documents are published by date and version

Tagging

Document Tagging or Metadata Capture

Security

User Roles and Security

Logging

Audit Logging and Tracking

Hierarchy

Document Hierarchy

Workflow

Document Workflow by Status etc.

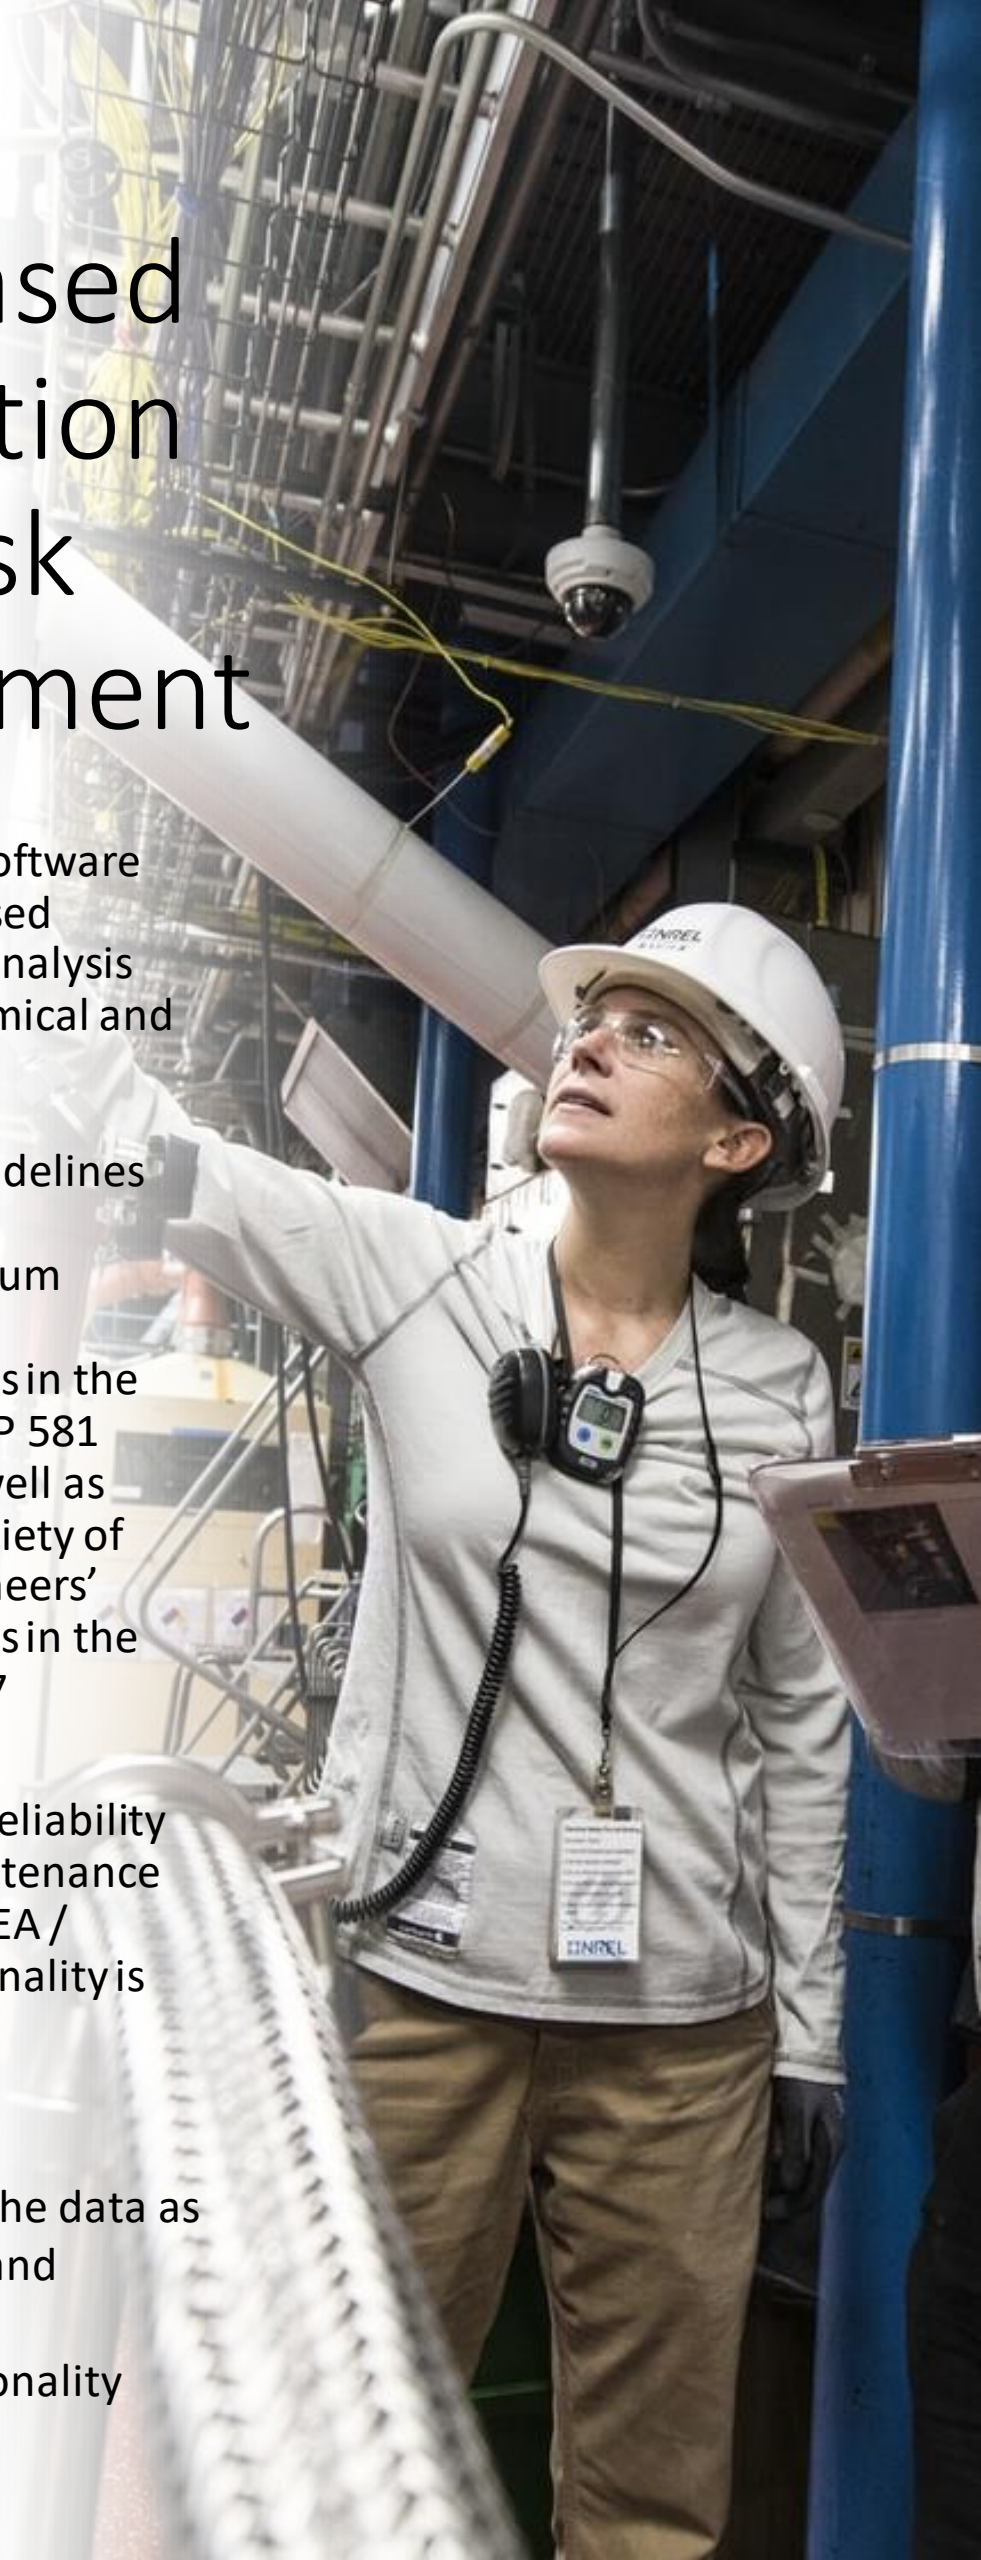

Full-featured document management software (EDMS) from Best CMMS is feature rich, enterprise grade and affordable. Its suite of features provide for document scanning, capture, indexing, storage, search, versioning, and document workflow review and approval

Risk Based Inspection and Risk Assessment

Best CMMS RBI software facilitates risk based inspection (RBI) analysis for oil & gas, chemical and power plants in adherence to the principles and guidelines presented in the American Petroleum Institute's recommendations in the API RP 580 and RP 581 publications, as well as the American Society of Mechanical Engineers' recommendations in the ASME PCC-3-2007 publication.

- Full-featured Reliability Centered Maintenance (RCM) and FMEA / FMECA functionality is also included.

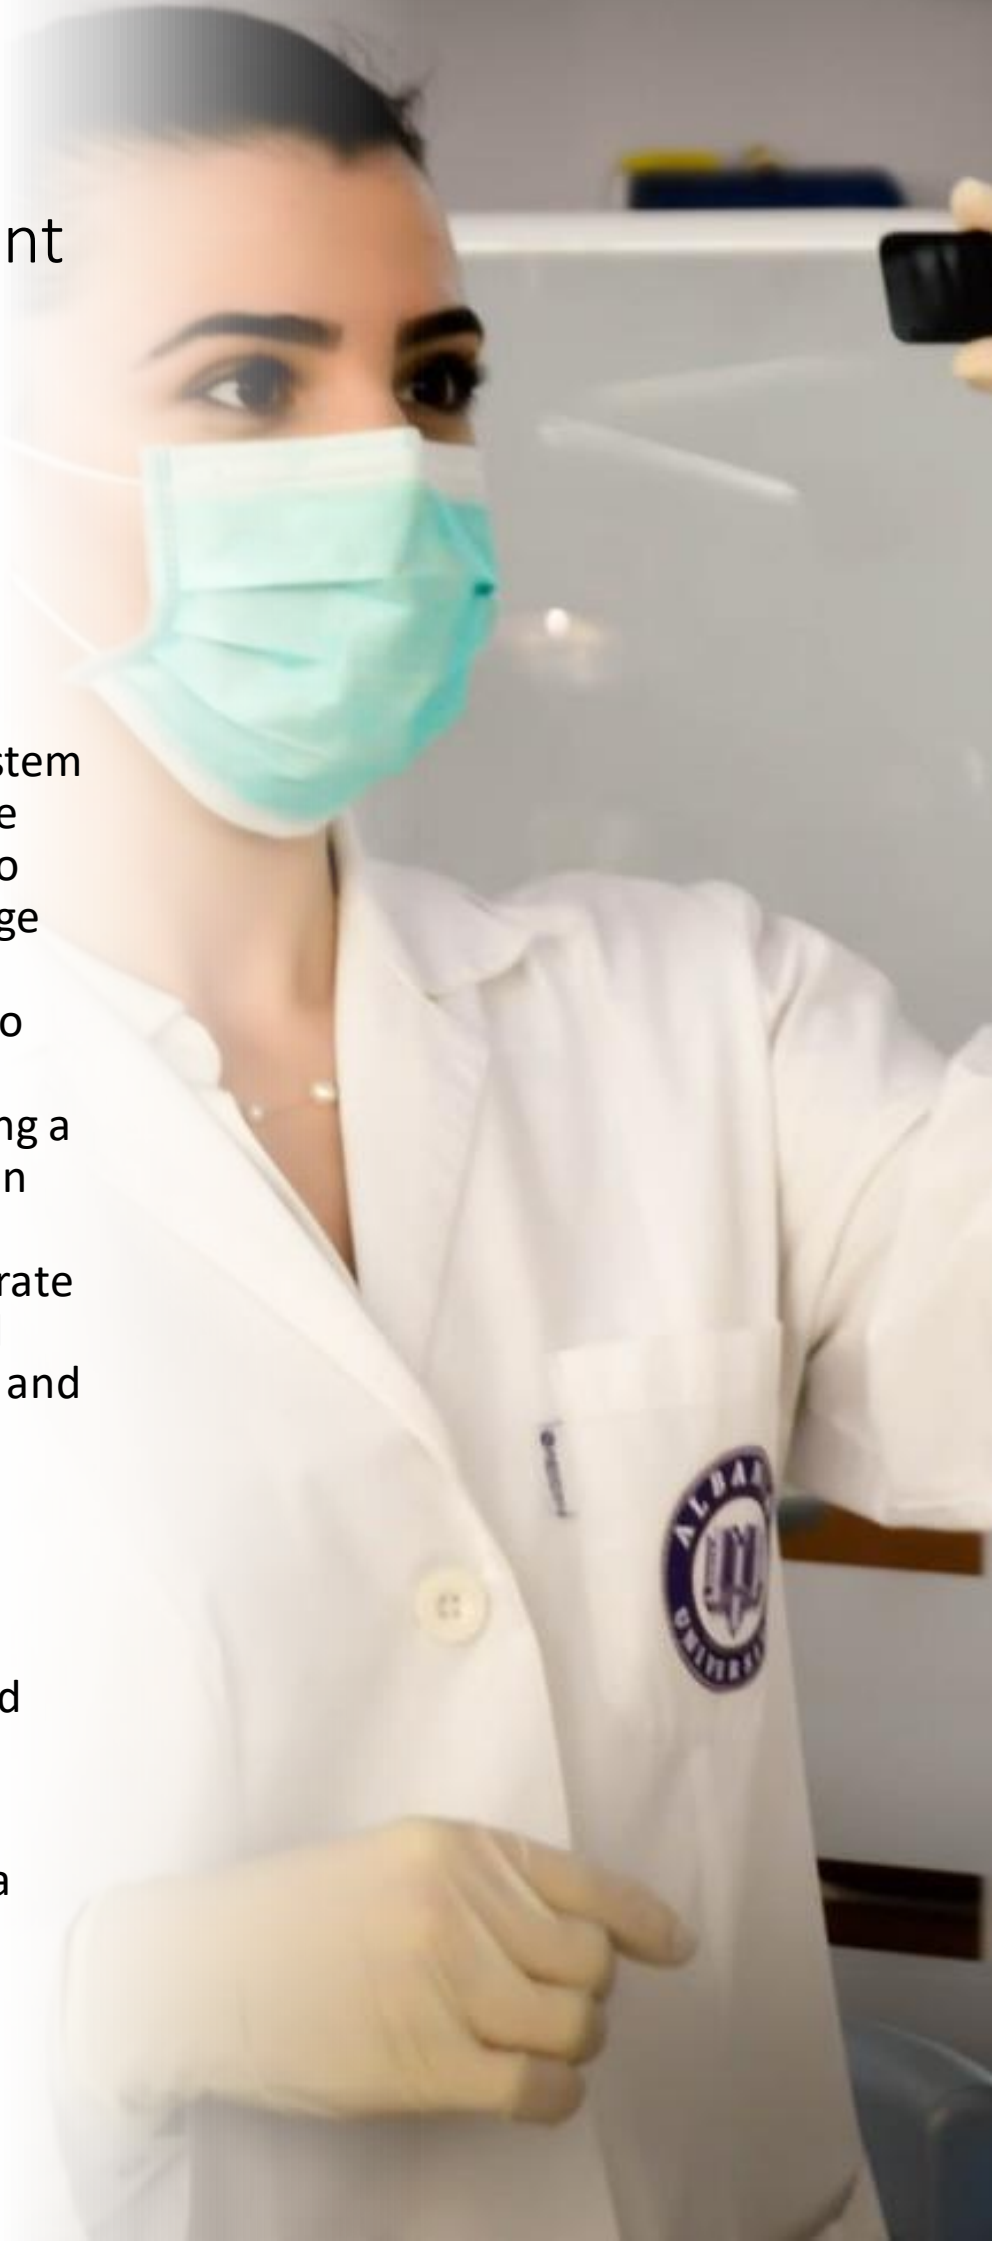

We make your interaction with the data as easy as possible and offer convenient drag/drop functionality where possible.

Laboratory Info. Management System

Best CMMS Laboratory Information Management System (LIMS) is software that allows you to effectively manage samples and associated data to improve lab efficiency. By using a LIMS, your lab can automate workflows, integrate instruments, and manage samples and associated information.

- Sample management
- Instrument and application integration
- Electronic data exchange
- and more...

A person's hand is shown interacting with a complex industrial machine. The machine features a prominent blue panel and various mechanical components, including a large roller and a motor. The background is a blurred industrial environment with various pipes and machinery. The text is overlaid on the right side of the image.

Best CMMS Computerized Maintenance Management

Best CMMS is based on latest web technology and conceptually designed so that the user interface can be customized in design and functionality to specific customer needs without programming.

New Web Dialogs can be created in just three steps based on existing page templates. The same logic applies to the implemented processes that can be adapted to the terminology and needs of the customer.

Sophisticated search functions and -methods are available for quick retrieval of data, including combo boxes.

CMMS Modules

iBIM CAD/BIM Visualization

CMMS modules that help improve equipment maintenance, extend asset life, and reduce part inventories – resulting in lower operating costs.

- Asset Management
- Work Order Management
- Planned Maintenance
- Inspections
- Fleet Management
- Work Flow Management
- Inventory Management
- Warehouse Management
- Purchase Management
- Labor, Suppliers and Vendors
- Contract Management
- Productions
- Calibration
- Reports and KPIs

Why Best CMMS ?

Comprehensive, easy to expand or customize

Ready for the cloud (AWS, Azure etc.), with zero installation effort on the client side.

Multiple languages.

3D Xbim browser.

Includes message board with embedded notification of ALERTS!

Integrated KPI Dashboard for performance critical data in chart/gauge fashion
